Instructor

Jan Pfänder | ETH Zurich | janlukas.pfaender@gmail.com | <https://janpfander.github.io/>

Course Description

Climate change communication influences how individuals, organizations, and societies perceive climate change, and how they react to it. In this course, we will discuss research findings in environmental psychology and communication science to understand specific challenges of climate change communication and how to address them.

Learning Objectives

The course will provide students with an overview of current psychological theory and best practices in the area of climate change communication. At the completion of the course, students will be able to:

1. Independently and accurately recognize challenges in climate change communication
2. Clearly describe the psychological mechanisms that influence climate change perceptions and attitudes
3. Critically apply insights from psychology to evaluate the effectiveness of climate change communication
4. Strategically design an effective climate change communication campaign

General Information

- ETH Zurich, room CHN G 42
- Tuesdays 16:15–18:00, weekly, Autumn 2026 (September 15 – December 15, 2026)
- An up-to-date schedule can be found on the [course website](#). This is also where slides and additional materials will be posted.

Participation

[TODO: carried over from 2024 UZH syllabus — rewrite]

Students are expected to actively participate in the course by drawing on their own reading of the materials, as well as their personal experiences and perspectives.

Materials

[TODO: carried over from 2024 UZH syllabus — rewrite. OLAT is the UZH platform, ETH uses Moodle.]

Course plan, reading materials, and slides will be available on OLAT. Please note that no recording will be available for this course.

Assessment

[TODO: carried over from 2024 UZH syllabus — rewrite. Exam date below is from the old course (2024).]

- On-site written exam (3 ECTS) with multiple choice and open questions.
- The exam will take place on 18 December 2024.

Lecture Plan (Draft)

Draft

Topics, descriptions, and literature below are carried over from a previous version of this course taught at UZH. Dates are correct for Autumn 2026. Everything else will be revised. Literature is cited as plain text until `references.bib` is populated from Zotero.

1 — 15.09.2026 — Introduction and organizational questions

[TODO: co-teacher attribution (“Viktoria, Jan”) from old course — confirm]

Why is climate change communication important and why is it so challenging?

Literature:

- Markowitz & Guckian (2018). Climate change communication: Challenges, insights, and opportunities.

2 — 22.09.2026 — Climate change, the deficit model, and public opinion

What is climate change and how does it occur? Does knowledge-focused communication about climate change lead to more concern and engagement? What is the public opinion about climate change?

Literature:

- Metag et al. (2017). Global warming's five Germanys.
- Leiserowitz et al. (2024). Climate Change in the American Mind: Beliefs & Attitudes. [TODO: missing from reference list in template]
- Shi et al. (2016). Knowledge as a driver of public perceptions about climate change reassessed.

3 — 29.09.2026 — Guest speaker: Dr. Leonard Creutzburg

[TODO: blurb below describes a different person (Dr. Lydia Ebersbach, WWF) — stale from old course, rewrite for the actual speaker]

Dr. Lydia Ebersbach is media relations manager at WWF Switzerland. She holds a Magister in History, Politics and Economics from Potsdam University, a PhD in Marketing from St. Gallen University and completed a CAS in Storytelling and Brand Journalism at MAZ / HSL. She will talk to us about the challenges of climate communication from the perspective of a Swiss NGO.

Literature: [TODO: framing literature listed here in the template likely belongs to session 4]

- Lakoff, G. (2010). Why it Matters How We Frame the Environment.
- Dasandi et al. (2022). Positive, global, and health or environment framing bolsters public support for climate policies.
- Supran & Oreskes (2021). Rhetoric and frame analysis of ExxonMobil's climate change communications.

4 — 06.10.2026 — Mental models and framing

What are mental models? Which frames are used in climate change communication? How can we frame climate change in a way that allows us to reach different population groups? What are the strategies, channels, and messages used by different stakeholders?

Literature: [TODO: template lists the climate-delay/denial literature here, which matches session 5's topic — check alignment]

- Lamb, W. F. et al. (2020). Discourses of climate delay.

- Cook, J. (2020). Deconstructing Climate Science Denial.

5 — 13.10.2026 — Climate change misinformation

What are discourses that delay action on climate change? How do you identify climate science denial and how do you respond to it?

Literature: [TODO: template's literature cell held only a guest-prep note ("Come to class with at least 3 questions for our guest speaker") — misaligned, assign readings]

6 — 20.10.2026 — Emotions and behavior

What is the role of emotions in climate change communication? How can we communicate about climate change in a way that increases feelings of self-efficacy? How does media usage relate to behavioral intentions?

Literature:

- Myers, T. A. et al. (2023). Emotional responses to climate change information and their effects on policy support.
- Ogunbode et al. (2022). Climate anxiety, wellbeing and pro-environmental action.
- Stanley et al. (2021). From anger to action.

7 — 27.10.2026 — A question of trust

Which actors are the most trusted sources of information about climate change? How can we maintain and potentially increase trust in climate change communicators? What is the role of climate scientists in communicating and engaging on the topic?

Literature:

- Cologna, V. et al. (2024). Trust in climate science and climate scientists: a narrative review.
- Oreskes, N. (2020). What Is the Social Responsibility of Climate Scientists?

8 — 03.11.2026 — Guest speaker: Dr. Cornelia Schwierz

[TODO: confirm speaker still current]

Dr. Cornelia Schwierz is Head of Climate Monitoring and Information at the Federal Office of Meteorology and Climatology (MeteoSwiss). In her talk, she will tell us about the challenges the Federal Office faces in communicating about climate change and how they overcome them.

Preparation: Come to class with at least 3 questions for our guest speaker.

9 — 10.11.2026 — Climate change in the media

How has climate change communication in the media evolved over time? How is climate change depicted in the media? How does imagery affect public perceptions of climate change?

Literature:

- Metag, J. et al. (2016). Perceptions of Climate Change Imagery.
- O'Neill, S. J. (2013). Image matters. Climate change imagery in US, UK and Australian newspapers.

10 — 17.11.2026 — MISSING

[TODO: topic was literally “MISSING” in the template — define this session]

Literature:

- Barkemeyer et al. (2017). Media coverage of climate change: An international comparison.
- Klinger, K., & Metag, J. (2021). Media effects in the context of environmental issues.
- Schäfer and Painter (2021). Climate journalism in a changing media ecosystem.

11 — 24.11.2026 — Guest speaker: Cornelia Eisenach

[TODO: blurb below describes a different person (Sabrina Weiss) — stale from old course, rewrite for the actual speaker]

Sabrina Weiss is a Swiss climate journalist. She holds a BA in Media & Communication Sciences from the University of Zurich and an MSc in Communication Psychology from the London School of Economics and Political Science. Sabrina Weiss is the co-founder of the Climate Journalism Network. In her talk, she will tell us about the challenges of climate change communication in journalism and how to overcome them.

Preparation: Come to class with at least 3 questions for our guest speaker.

12 — 01.12.2026 — Guest speaker: Reto Knutti

[**TODO: description below is a wrap-up summary from the old course, not a speaker blurb — rewrite**]

Based on what we have learned in the previous weeks, we will summarize and discuss successful communication strategies.

Literature:

- Maibach, E. W. et al. (2023). Harnessing the power of communication and behavior science to enhance society's response to climate change.
- Corner et al. (2018). Principles for effective communication and public engagement on climate change. [**TODO: missing from reference list in template**]

13 — 08.12.2026 — Guest speaker: Industry/Kanton

[**TODO: placeholder title — confirm speaker. Description below is the old course's recap-session text**]

We will reflect on the contributions by our guest speakers and how they relate to what we have learned in the previous sessions. In preparation for the exam, we will recap the main lessons learnt in this course.

14 — 15.12.2026 — Discussion and lessons learnt

[**TODO: description below contains stale 2024 exam logistics — rewrite**]

The exam will take place on-site. The format of the exam (online or pen and paper) will be communicated at a later stage.

References (draft, to be replaced by references.bib)

[**TODO: replace this plain-text list with a Zotero Better BibTeX export to references.bib, then enable nocite/reference-section-title in the front matter and cite with @keys. Leiserowitz et al. (2024) and Corner et al. (2018) are cited above but missing here.**]
